## Text Editor Window

Click the Load file button to upload a text file from your computer into the Text editor. This can then be edited in the Text editor and later saved using the Save as button. Then click the Continue to GUI button in order to parse the text file and continue to the GUI if the file is correctly parsed. If there is an error in your file, this will appear in the Error message box after the Continue to GUI button is pressed.

Main GUI Window

Click the Run button to run the simulation for the selected number of cycles or the Continue button to continue a previously run simulation. After the run button is pressed, a Signal trace will appear for each monitor. You can add monitors by selecting a monitor from the Add monitor drop down menu and then clicking Add. Remove monitors in a similar way in the Remove monitor section. Clicking Remove all will remove all monitors from the screen. If you wish to view traces in 3D mode click the 3D mode button. In 3D mode you can return to 2D mode by clicking the 2D mode button appearing in the same place. Click the Back to text editor button to return to the Text Editor Window. Clicking on the Help button will open this User Guide. Finally, you can scroll around the 2D traces by holding down the right mouse button and moving the mouse sideways. If you wish to reset the view of a trace simply press the Reset View button. In 3D mode you can also rotate the trace using the left mouse button and zoom using the mouse wheel.
